

INSTRUCTIONS FOR USING THE INTERACTIVE PDF VERSION OF THE TILF APPLICATION:

1. This interactive PDF allows you to fill out the application on your computer, rather than printing out a blank form and filling it in by hand or on a typewriter.
2. You may use the free Adobe Reader software (also called Acrobat Reader) to complete the form; however, you will not be able to save what you enter. Be sure you plan to complete the application at a time when you can finish the entire form in one sitting, and then print it out and sign it. If you close the document before you finish, you will lose what you have entered. If you own the full version of Adobe Acrobat, you can save your form.
3. Use your Tab key to move to the next blank as you fill out the form.
4. You may still include additional pages with your application where noted.
5. After completing the form, print multiple copies so you will have one for your records.
6. Don't forget to sign your completed application!
